

Indicator-level readiness scores, grouped by domain

D1	Legal basis	National oil pollution preparedness and response legislation	Ratification and domestication of OPRC 1990 and CLC/FUND	Port-level statutory instrument for spill preparedness and	Legal mandate and approval status of the national contingency	Enforcement provisions, penalty schedule and	3 defined and verified 2 defined 1 partial or ambiguous 0 absent
		2	1	3	3	2	
D2	Authority & command	Legally designated competent national authority for oil	Designated On-Scene Commander role, appointment and	Incident command system formally adopted and documented	Clarity of inter-agency roles, delegation and hand-	24/7 duty officer roster and command continuity	
		1	3	2	3	3	
D3	Notification	Single 24/7 point of contact for spill notification	Mandatory reporting thresholds and notification timelines	Standardised notification format (POLREP or equivalent)	Escalation pathway and neighbouring-state / IMO notification	Logged notification drill performance and response-time records	
		1	2	3	2	2	
D4	Tiered response	Tier 1/2/3 definitions adopted with quantitative	Tier 2 regional and mutual-aid agreements formally concluded	Tier 3 international assistance arrangements (e.g.	Documented activation criteria and escalation decision	Customs and immigration fast-track for cross-border	
		0	1	2	2	1	
D5	Resources & equipment	Containment boom inventory sufficiency and deployment	Mechanical recovery (skimmer) capacity against the design	Temporary storage and oily-waste handling and disposal capacity	Dispersant policy, approved stockpile and application capability	Equipment maintenance, testing and readiness certification regime	
		1	0	0	1	0	
D6	Training & exercises	IMO OPRC Level 1/2/3 training coverage of designated personnel	Annual exercise programme (notification,	Full-scale multi-agency exercise conducted within the	Exercise evaluation against pre-defined performance objectives	Competency records and refresher-training cycle maintained	
		0	2	2	0	1	
D7	Funding & liability	Dedicated standing response fund or ring-fenced budget line	Emergency procurement and rapid disbursement mechanism	Compensation claims-handling capacity (CLC/FUND, IOPC)	Cost-recovery and polluter-pays enforcement mechanism	Verification of vessel insurance and financial security	
		0	1	0	2	1	
D8	Plan currency	Port oil spill contingency plan exists and is formally	Plan review and update cycle of three years or less demonstrably	Environmental sensitivity mapping and resource atlas	Scenario-based risk assessment underpinning the plan	Controlled distribution and operational	
		2	0	1	0	2	
D9	Coordination	Standing multi-agency coordination committee with terms of	Terminal operators and industry integrated into the port plan	Public, media and affected-community communication protocol	Regional cooperation arrangements (Bay of Bengal / SACEP)	Joint planning with fisheries, environment and coastal	
		0	1	1	3	1	
D10	Monitoring & learning	Incident and near-miss database with systematic record	Mandatory after-action review following incidents and	Corrective actions tracked to documented closure	Readiness performance indicators monitored and reported	Independent audit or external peer review of preparedness	
		2	2	1	1	1	
		1	2	3	4	5	

Each cell is labelled with the indicator it measures and its adjudicated 0-3 score.
